

ACCESSORIES - HOLD OPEN ARM

# Hold-Open Arm

Rutland's Hold-Open arms are designed for use on non-fire rated doors where there is a requirement for the door to be held open. An example of where a hold-open arm might be used is with a standard scissor arm door closer on an exit door.

The Rutland HOPA.2.SE & HOPA.2.BK are universal, so can be used on PULL or PUSH side of the door.

## Technical Information

- Compatible with PULL or PUSH side
