

Installation Jig

This lightweight, universal door closer installation jig is designed for professional installers who need precision and efficiency on every job. Built with strong tool grade material bushings, it allows accurate drilling of pilot holes that stand up to repeated use. The jig works seamlessly with both left- and right-hand doors and features adjustable settings to accommodate different door stop widths for push-side installation. Comfortable for long periods of handling, it combines durability with ease of use, making door closer installation faster, cleaner, and more reliable.

Fitting Templates and Jigs

Paper fitting instructions are ideal for fitting a single door closer, however for speed and accuracy Rutland offer bespoke steel jigs for their door closers that can be ordered with the door closer. These jigs increase the speed in fitting more than one closer with precise accuracy every time due to correct positioning on the door and frame.

Find out more today about our bespoke steel jigs by contacting the sales team on sales@rutlanduk.co.uk.
